

# Basic SQL

Part 4

# INSERT, DELETE, and UPDATE Statements in SQL

# The INSERT Command

- In its simplest form, `INSERT` is used to add a single tuple to a relation.
- We must specify the relation name and a list of values for the tuple.
- The values should be listed *in the same order* in which the corresponding attributes were specified in the `CREATE TABLE` command.

- **U1:** INSERT INTO EMPLOYEE  
VALUES ('Richard', 'K', 'Marini',  
      '653298653', '1962-12-30',  
      '98 Oak Forest, Katy, TX', 'M',  
      37000, '653298653', 4 );

- A second form of the `INSERT` statement allows the user to specify explicit attribute names that correspond to the values provided in the `INSERT` command.

- A DBMS that fully implements SQL should support and enforce all the integrity constraints that can be specified in the DDL.

- **U2:** INSERT INTO EMPLOYEE (Fname, Lname, Ssn,  
Dno)  
VALUES ('Robert', 'Hatcher',  
'980760540', 2);

(U2 is rejected if referential integrity checking is provided by DBMS.)

**EMPLOYEE**

Fname	Minit	Lname	<u>Ssn</u>	Bdate	Address	Sex	Salary	Super_ssn	Dno
John	B	Smith	123456789	1965-01-09	731 Fondren, Houston, TX	M	30000	333445555	5

- U2A:  

```
INSERT INTO EMPLOYEE (Fname, Lname,  
Dno)  
VALUES ('Robert',  
       'Hatcher', 5);
```

(U2A is rejected if NOT NULL checking is provided by DBMS.)

## EMPLOYEE

Fname	Minit	Lname	<u>Ssn</u>	Bdate	Address	Sex	Salary	Super_ssn	Dno
-------	-------	-------	------------	-------	---------	-----	--------	-----------	-----

## DEPARTMENT

Dname	<u>Dnumber</u>	Mgr_ssn	Mgr_start_date
-------	----------------	---------	----------------

## DEPT\_LOCATIONS

<u>Dnumber</u>	<u>Dlocation</u>
----------------	------------------

## PROJECT

Pname	<u>Pnumber</u>	Plocation	Dnum
-------	----------------	-----------	------

## WORKS\_ON

<u>Essn</u>	<u>Pno</u>	Hours
-------------	------------	-------

## DEPENDENT

<u>Essn</u>	<u>Dependent_name</u>	Sex	Bdate	Relationship
-------------	-----------------------	-----	-------	--------------

- A variation of the `INSERT` command inserts multiple tuples into a relation in conjunction with creating the relation and loading it with the *result of a query*.

- **U3A:**       CREATE TABLE WORKS\_ON\_INFO (  
                  Emp\_name VARCHAR(15),  
                  Proj\_name VARCHAR(15),  
                  Hours\_per\_week DECIMAL(3,1));
- **U3B:**       INSERT INTO WORKS\_ON\_INFO (Emp\_name,  
                  Proj\_name, Hours\_per\_week )  
SELECT E.Lname, P.Pname, W.Hours  
FROM       PROJECT P, WORKS\_ON W, EMPLOYEE E  
WHERE      P.Pnumber=W.Pno AND W.Essn=E.Ssn;

- Notice that the WORKS\_ON\_INFO table may not be up-to-date; that is, if we update any of the PROJECT, WORKS\_ON, or EMPLOYEE relations after issuing U3B, the information in WORKS\_ON\_INFO may become outdated.
- We have to create a view to keep such a table up-to-date.

# The DELETE Command

- U4A:       DELETE FROM EMPLOYEE  
              WHERE    Lname='Brown';
- U4B:       DELETE FROM EMPLOYEE  
              WHERE    Ssn='123456789';
- U4C:       DELETE FROM EMPLOYEE  
              WHERE    Dno=5;
- U4D:       DELETE FROM EMPLOYEE;

# The UPDATE Command

- **U5:** UPDATE PROJECT  
SET Plocation = 'Bellaire', Dnum = 5  
WHERE Pnumber=10;
- **U6:** UPDATE EMPLOYEE  
SET Salary = Salary \* 1.1  
WHERE Dno = 5;
